

Kung Fu Panda™ Stick Puppet

Pig

ASSEMBLY INSTRUCTIONS

Time to Complete: Approximately 45 minutes

Level: Medium

GETTING STARTED

Materials:

- Metal-edged ruler
- Butter knife
- Small hole punch
- Scissors or X-ACTO knife
- Cutting mat (optional)
- Multipurpose glue
- 6 or more small brads

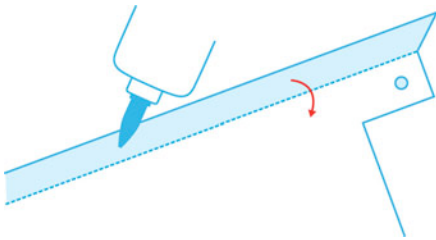

1. Score all the pieces: Using a ruler as a guide, run the back side of a butter knife firmly along all the dotted lines.

2. Cut around each body piece, leaving a bit of white border. Punch holes where indicated with an "x" on all pieces except sticks. Next, fold each body piece in half on the dotted line before cutting out along solid lines with scissors or an X-ACTO knife and cutting mat. For the sticks, cut apart on solid lines, and hold off on punching holes.

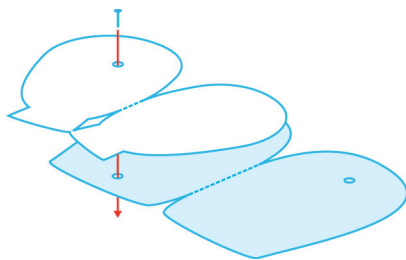

ASSEMBLE THE STICKS

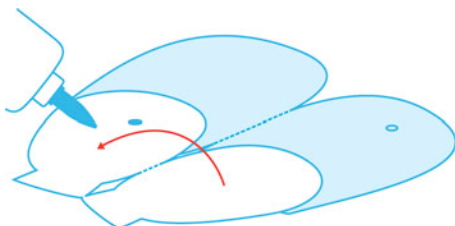

3. Fold stick piece (1) over on dotted line and crease. From there, continue to fold paper over until your stick is complete. Glue into place and let dry. Repeat with remaining two stick pieces. Punch a hole where indicated at the top of the stick, so that the hole goes through both layers of paper. Repeat with second stick (the third one does not need a hole).

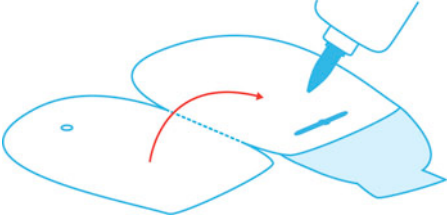

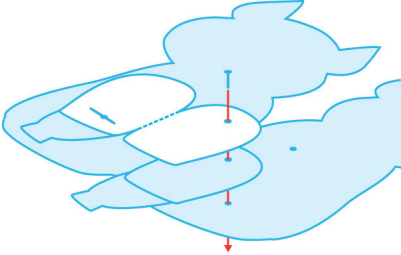

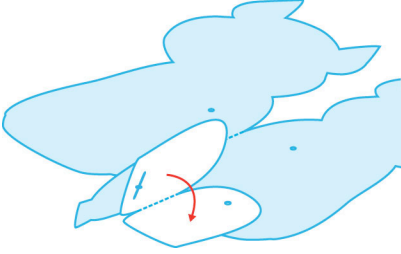

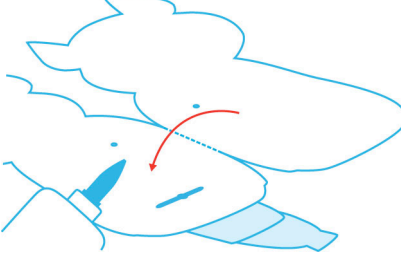

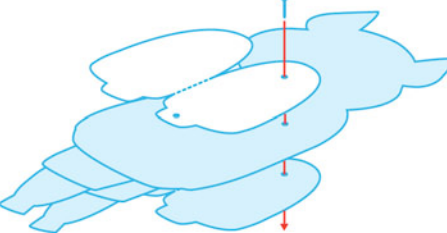

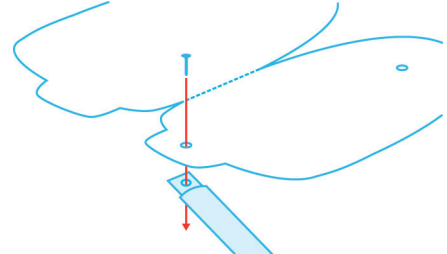

ASSEMBLE THE LEGS & FEET

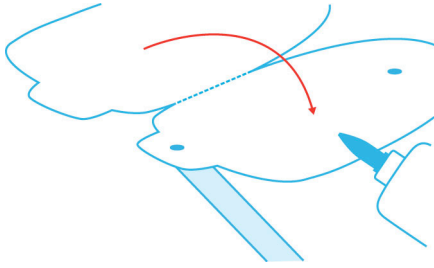

4. Align hole in left lower leg piece (2) (blank side up) with hole in bottom of left thigh piece (3) (printed side up). Insert brad through the lower leg, then the thigh, and secure.

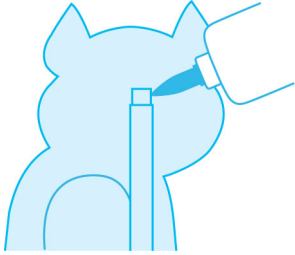

5. Fold lower leg on dotted line and glue.

	<p>6. Fold thigh on dotted line and glue. Repeat steps 4 and 5 with right lower leg (4) and right thigh (5) pieces (keep right thigh open for now).</p>
	<p>7. Align hole in completed left thigh with hole in bottom of body piece (6) (printed side up). Next, align hole in right thigh piece (blank side up), with left thigh. Insert brad through right thigh, then the left thigh and body, and secure.</p>
	<p>8. Fold right thigh on dotted line and glue.</p>
	<p>9. Fold body piece on dotted line and glue.</p>
<p>ASSEMBLE THE ARMS & HANDS</p>	
	<p>10. Align the top holes in both the right arm (7) and left arm (8) pieces (blank side up) with either side of the top hole (both front and back) in the body piece. Insert brad through hole in the left arm, then through the body and right arm, and secure.</p>
	<p>11. Align the hole in a completed stick with hole in the left arm (blank side up). Insert brad through the arm, then the stick, and secure.</p>

12. Fold arm on dotted line and glue.

13. Repeat steps 10 through 12 with right arm piece. Glue the third stick to the back of puppet's head. You're done!
