JetAnywhere Print Solution

Print anytime, anywhere

The Internet age has brought about a whole new meaning to information overloading. So much information is readily available at just the click of a button. And it's getting easier and faster to access the Internet. Broadband access has sped up the flow of information while wireless technologies have enabled anywhere access.

Along with this easy availability of information from the Internet comes the need for easy access to printing service, especially when out of the office. Having the convenience of printing anywhere is vital for business travellers who may need to print quotations, business proposals, charts, or contracts while on the road. They need easy access to printers and convenient payment for printing services.

Here's where the JetAnywhere Print Solution comes in. With JetAnywhere, business travellers can enjoy anywhere, anytime printing from either a high-speed wired or wireless access point in a public place, such as the airport, Hot Spot zone, educational institution, or hotel. They can print and pay for their printouts at convenient locations.

System architecture

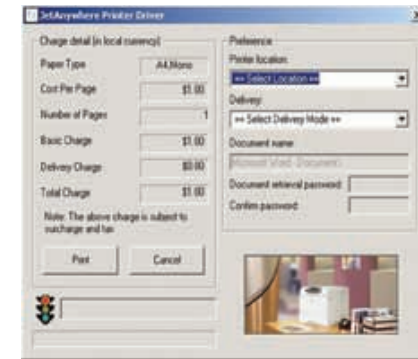

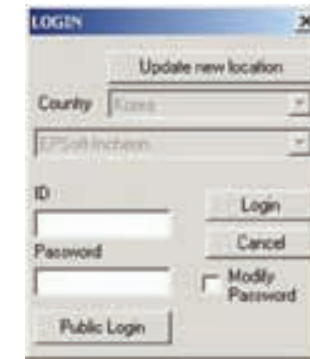

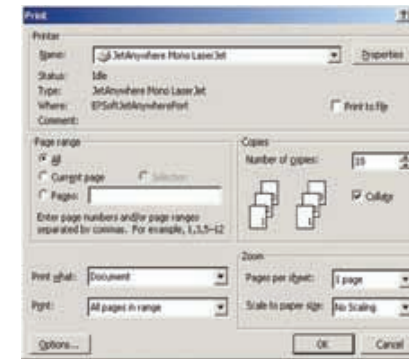

How it works

On his way to meet his client in Shanghai, Victor receives a call from his office about new details that must be added to his presentation.

He powers up his notebook and makes the changes while in the taxi. Along the way, he spots a Hot Spot zone nearby that offers printing service using JetAnywhere Print Solution. He pops by the Hot Spot, clicks "file/print" from his application, and selects the "JetAnywhere printer driver" which he pre-installed, and sends his print job to the Hot Spot's printer.

Victor goes over to the cashier and pays for the printing service. The cashier activates the print job and passes Victor the printouts. A more confident Victor is now ready for his presentation to his customer.

JetAnywhere Print Solution technology

Features

- Prints through Windows® driver directly to the printer
- Offers different types of delivery and secure options
- Does not need any e-mail transaction for job ID and password
- Prints from all applications
- For hotels, displays operator's logo on the client Windows® driver
- Blocks unauthorised jobs
- Supports various payment systems

Benefits at a glance

To users

- The convenience of printing from anywhere within Internet-enabled areas
- Enriching experience that ensures productivity
- Use same printer driver for all locations using this system

To operators

- Market differentiators and repeat business
- Service that generates additional revenue
- Solution leverages on existing infrastructure
- Arranges proper payment system
- Integrates with billing system (hotel/telco on post-payment)
- Supports scratch card system (university on pre-paid system)
- Pay on-site (Hot Spot/printing house – releases job after payment)

Specifications

1. JetAnywhere server

- Map installed network printers and name of that printer (location)
- Cost setting per page (colour/monochrome, different paper sizes)
- Uploads corporate image file to be downloaded to the client printer driver
- User and security management
- Usage report

2. JetAnywhere printer driver

- Authenticated by user ID and password
- Downloads relevant information from the JetAnywhere server: printer location and delivery mode
- Once installed on the PC, the same printer driver can be used anywhere
- Real-time check of printer status and holds printing if printer is not ready
- Displays number of pages (colour/monochrome) and costs
- In hotels, provides secure printing options that only the guest can print with his/her password on the printer

3. JetAnywhere DIMM

- Enhances security by blocking unauthorised print job through network or parallel port – can only print using the JetAnywhere system
- Prints cover page if it is set by JetAnywhere server

4. JetAnywhere PrintManager

- Releases or deletes a job which was sent by secure option in client Windows® driver

Areas of applications

- Hotels
- Universities
- Public libraries
- Printing houses
- Hot Spot zones
- Internet cafés
