

HP Smart Web Printing enables simple, predictable web page printing

Print what you want, how you want

HP Smart Web Printing lets you select, store and organise text and graphics from multiple web pages and then edit and print exactly what you see on screen. It gives you the control you need to print meaningful information while minimising waste.

Save paper and reduce waste

Save paper by combining portions of numerous web pages onto one page before printing. No more wasteful prints containing clipped pages or a few lines of useless text. Now you'll get an accurate print of the web page you see on screen.

Take control of your web search findings

Selecting content on a web page can be challenging. Now, you can easily select text and graphics from multiple websites and combine them in your custom document. Create a personal digital scrapbook for each planning and research project.

Edit content to suit your needs

Once you transfer content to your custom document, you can edit the text and graphics and even resize and delete them. Then, print exactly what you see on screen. HP Smart Web Printing will also save your custom document as an Adobe PDF file.

Get neater, more accurate prints

HP Smart Web Printing automatically scales web page output to fit the width of your paper. This helps ensure that your print copy contains all the information you see on screen. Text and images will remain intact. (Internet Explorer 6 only).

Technical specifications
